The screenshot shows the phpMyAdmin web interface in a browser. The address bar indicates the URL: `localhost/phpmyadmin/index.php?route=/table/sql&db=exhibition_db&table=cars`. The interface includes a top navigation bar with tabs for Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, Tracking, and Triggers. The main content area displays the results of a SQL query: `SELECT make, model FROM cars WHERE price < 15000 AND price > 10000;`. A status message at the top of the results area says "Showing rows 0 - 0 (1 total, Query took 0.0001 seconds.)". Below the query, there are links for Profiling, Edit inline, Edit, Explain SQL, Create PHP code, and Refresh. A table of results is shown with columns 'make' and 'model', but it is currently empty. The interface also includes a 'Show query box' button, a 'Show all' checkbox, and a 'Number of rows' dropdown set to 25. At the bottom, there are options for Query results operations (Print, Copy to clipboard, Export, Display chart, Create view) and a 'Bookmark this SQL query' section with a label input field and a checkbox for 'Let every user access this bookmark'.
